

This proposed rule will increase operating costs for LPTV, Class A and Television translators by an extent that many operators would be in violation or simply cease operations. If it is the intent of the FCC to burden the over 99% of operators who are careful to maintain quality, violation-free content with the behavior of the remaining broadcasters, it is a sad reflection on the trust of the public airways that we have agreed to in accepting our responsibilities as licensees.

Existing rules describe our responsibilities. Most of us (99%+) follow the rules. Please don't burden us with the Commission's police activity.
